ABSTRACT

Welcome to the TecVise (TV) Games White Paper. This document outlines the vision, purpose, and benefits of the VISE token, a cryptocurrency built on the Ethereum blockchain using the ERC-20 standard. TecVise Games is committed to ushering in the next era of blockchain-based gaming, offering players the opportunity to earn money while playing. This whitepaper elucidates the fundamental concepts behind TecVise and how it is poised to revolutionize the gaming industry. Furthermore, we articulate our vision for the future of gaming, the role TecVise Games plays in that vision, and our roadmap for the coming years.

INTRODUCTION

The gaming industry stands as one of the most rapidly expanding sectors in the 21st century. Global sales in this industry were estimated to reach approximately USD 201 billion in 2022. To put this in perspective, that's roughly seven times the revenue generated by global movie theaters in the same year. In comparison, the music industry amassed only about \$26 billion in 2022. By 2027, gaming industry revenue is projected to exceed \$310 billion, with the blockchain gaming sector expected to make a substantial contribution. According to the Newzoo Global Games Market Report, there are 3.2 billion gamers worldwide, ranging from highly active to occasional players. As of September 2023, the largest gaming platform, Steam, boasts over 30 million daily active players.

With the advent of blockchain technology, the gaming industry is undergoing a profound transformation, offering transparency, security, and genuine ownership of gaming assets. This revolutionizes how players engage with virtual worlds, fostering a trustless environment that encourages peer-to-peer interactions. TecVise Games stands at the forefront of this revolution, dedicated to crafting innovative and immersive blockchain games. Our objective is to provide players with an exhilarating and rewarding experience by amalgamating blockchain technology with gaming.

TecVise Games

TecVise Games stands as a prominent blockchain game development company. Our team, comprising experienced developers, artists, and blockchain enthusiasts, is fervently committed to creating games that harness the potential of blockchain technology. Our games deliver unique gaming experiences, in-game asset ownership, and the prospect of earning real-world value while playing. Beyond developing our own games, our platform is the avenue through which we foster and promote games by other developers. We aim establish a gaming platform that hosts the finest blockchain games. Over the next few years, we intend to launch these games and collaborations, fundamentally reshaping how gamers engage with virtual realms. TecVise Games was founded as a DAO and will become more and more decentralized over the development period. The in-house TecVise platform will give token holders the right to participate in the development process..

TecVise Platform

TecVise Games provides its dedicated gaming platform where users gain access not only to all games within the TecVise ecosystem but also have the ability to acquire NFTs (non-fungible tokens). All gaming NFTs from various games are available for purchase on the TecVise platform. Additionally, users can create individual profiles to enhance their gaming experience, allowing them to interact with the community, form clans, and host joint parties. TecVise Games will introduce regular contests, raffles, and incentives on their platform. The TecVise platform caters to every type of player, whether they prefer MMORPGs, FPS games, arcade games, or other genres.

TECVISE ECOSYSTEM

TecVise Games offers a dedicated gaming platform that grants users access to a diverse array of games within the TecVise ecosystem. In addition to game access, users have the opportunity to acquire NFTs (non-fungible tokens) linked to these games. Our platform is designed to provide a comprehensive gaming experience, where users can create individual profiles, engage with a vibrant community, establish clans, and host collaborative events.

Enriched Gaming Experience

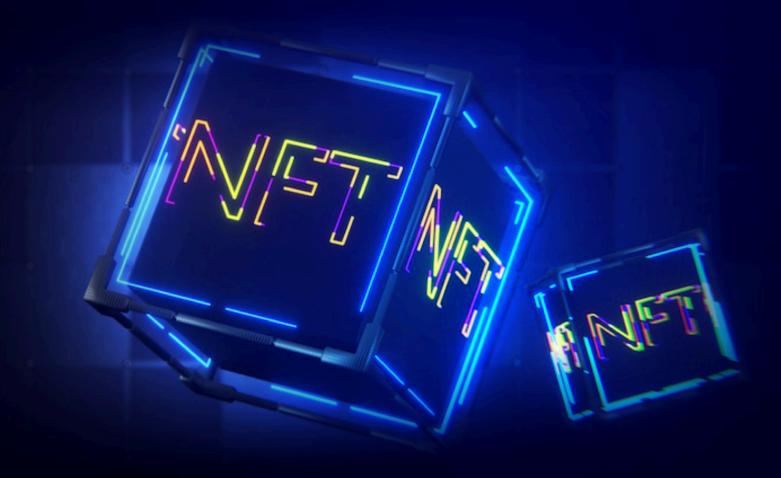

At TecVise Games, we understand that gaming is more than just entertainment; it's a social experience. That's why we've built features that allow users to create personalized profiles, fostering connections within the gaming community. Whether you're an enthusiast of MMORPGs, shooter games, arcade classics, or any other gaming genre, our platform caters to every type of player.

Access to Gaming NFTs

Our platform serves as a gateway to a treasure trove of gaming NFTs sourced from various games. These unique digital assets can be acquired by users through the TecVise platform. With this feature, we aim to provide gamers and collectors with a seamless means of obtaining and trading NFTs, enhancing the overall gaming ecosystem.

Engagement and Rewards

TecVise Games is committed to fostering an engaged and motivated user base. To achieve this, we regularly host contests, raffles, and incentives on our platform. These activities not only provide an added layer of excitement but also reward our community for their dedication and participation.

Access to Gaming NFTs

At TecVise Games, we understand that gaming is more than just entertainment; it's a social experience. That's why we've built features that allow users to create personalized profiles, fostering connections within the gaming community. Whether you're an enthusiast of MMORPGs, shooter games, arcade classics, or any other gaming genre, our platform caters to every type of player.

The VISE Token (VISE)

The VISE Token (VISE) serves as the native cryptocurrency of the TecVise ecosystem. It is an ERC-20 token built on the Ethereum blockchain and forms the bedrock of our gaming ecosystem, offering diverse benefits to players and stakeholders.

Token Utility

In-Game Currency: VISE serves as the primary in-game currency within TecVise Games, allowing players to purchase in-game items, skins, and assets.

Governance: Token holders have the opportunity to engage in the governance of TecVise Games. Decisions regarding game development, updates, and community initiatives are subject to token holder voting.

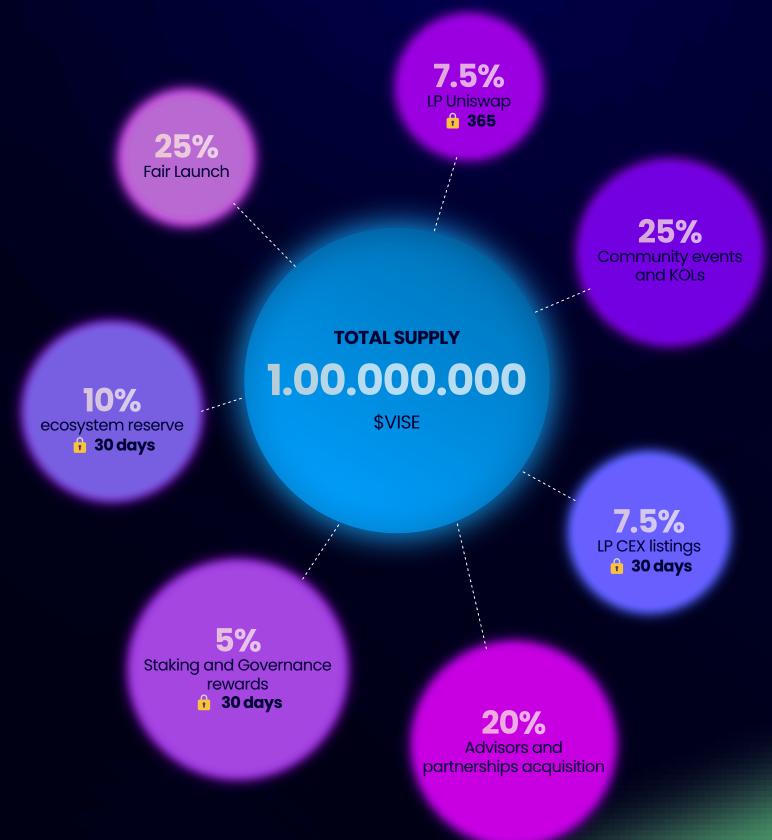

Staking and Rewards: VISE token holders can stake their VISE to earn rewards, which may include additional in-game assets, early access to new games, and a share of the revenue generated by TecVise Games.

Play-to-earn: Our blockchain games enable players to earn VISE by participating in various in-game activities, tournaments, and competitions. Players can also trade or sell their in-game assets for VISE on supported marketplaces.

NFT Integration: Certain in-game assets will be tokenized as non-fungible tokens (NFTs) on the blockchain, making them available for purchase, sale, and trade in the broader NFT market, thereby enhancing their value.

TOKENOMICS

The Future of Gaming with TecVise Games

Blockchain Integration

TecVise Games seamlessly incorporates blockchain technology to ensure unparalleled transparency and security in gameplay and asset ownership. Every in-game asset and transaction is meticulously recorded on the blockchain, offering players indisputable proof of ownership.

Decentralized Gameplay

Our game design philosophy revolves around decentralized principles. Players wield complete control over their in-game assets, with no centralized authority dictating gameplay. This empowers users to actively shape the virtual worlds they inhabit.

Play-to-Earn Opportunities

With TecVise Games, players can now derive tangible value from their gaming adventures. By participating in quests, overcoming challenges, and engaging in trading, players can amass VISE Tokens and exchange them for real-world value, effectively revolutionizing the concept of "play-to-earn.

Partnerships

TecVise Games is committed to redefining the gaming industry, and this entails forging meaningful collaborations. In the future, as one of the premier blockchain gaming companies, TecVise Games aims to establish partnerships with gaming studios from the web2 era. This strategic move aims to bridge the world of blockchain gaming with traditional gaming studios, fostering innovation and growth.

Games Developed by TecVise Games

For years, millions of gamers have delighted in multiplayer titles such as Counter Strike and PUBG, games that captivate users through compelling gameplay, constant challenges, and sheer fun.

Such immersive experiences have been somewhat absent in the realm of blockchain gaming, which has predominantly featured simple arcade-style games. However, these games often lose their appeal quickly due to their repetitive nature.

TecVise Games has taken it upon themselves to transform this landscape.

CoinCombat: Digital Rivals

TecVise Games inaugural venture into game development is CoinCombat: Digital Rivals, a First Person Shooter (FPS) like no other. CoinCombat: Digital Rivals is not your typical multiplayer FPS; it offers players the opportunity to engage in matches on diverse maps, with game stakes in the form of VISE. The prize pool for each match is crafted through individual entry fees paid in VISE.

In-game items predominantly exist as NFTs, affording players true ownership of their assets. This ownership enables them to trade, exchange, or sell their items on NFT trading platforms.

Game Mode

The first mode will be a Battle Royale, in which players will compete against each other on different maps.

In order to create fair playing conditions, there will be a ranking system for all Battle Royal modes (everyone against everyone), which will only place equal opponents in a lobby.

In addition to the normal lobbies, TecVise Games will provide free lobbies through which players can improve their skills, test different strategies, try out various weapons and train on the respective maps.

Entry fees & prize pools

The prize pool is made up of, among other things, the entry fees of the individual participants, whereby the amount of the entry fee can be determined by the host of the game. The higher the entry fee, the higher the prize pool and thus the potential winnings.

Example:

An entry fee of 500 VISE from the host is used as a basis for the upcoming round, which must be provided by each player in order to participate in the game.

With 24 players, this results in a total prize pool of 12,000 VISE to be played for.

Distribution of prize pool:

• 70% of the prize pool will be distributed to the players

1st place: 45%
2nd place: 15%
3rd place: 10%

- 10% TecVise Games
- 15% Map NFT Owner
- 5% 💧 Burning

Revenue TecVise Games:

TecVise Games can run special events for existing players, regular community contests as well as promotion campaigns to attract new players. Furthermore, gaming VISE packages can be put to e, which is generated through the games, is specifically returned to the players.

Map NFT Owner:

CoinCombat will be interesting not only for good gamers, but also for all those who have a good business sense.

15% of all prize money from each completed game will be distributed to Map NFT owners.

Each game map is an NFT stored on the blockchain, which can be purchased by our community and thus becomes their private property. Depending on the rarity level of the NFT, the owner will share in the respective prize pools of all games from all future modes on a percentage basis. Map NFTs are divided into 6 rarity classes.

MAP NFTs must be activated once within 24 hours to make the maps available to players to generate Rewards.

In Game Purchases:

Each player is equipped with a set number of weapons and ammunition at the beginning of each round, depending on the character selected. Further weapons as well as ammunition, protection, grenades and other accessories can be purchased within the purchase zone (start zone) for a certain time against VISE. For this purpose, a purchase time is set up before each round, which is exclusively intended for this purpose. During this time, players cannot perform any other actions before the round starts. The VISE used for this purpose will be added to the prize pool.

Gaming NFTs:

Various types of gaming NFTs will appear, which can be used within the game, among other things. Below is a list of the respective categories and the respective properties of the NFTs.

Maps:

Map NFTs can be activated every 24 hours within the dashboard to make them available to players. This can be used to receive a share of the profits of each game. These vary depending on the rarity of the NFT.

Character:

Among the character NFTs, there will be several expert classes, which differ in their basic characteristics and base values such as marksmanship, resistance or speed. Depending on the rarity of the NFT, these will vary.

Weapons:

Various weapons are represented in the form of NFTs, these range from the 9mm Glock to a classic AK47 to the dreaded Arctic Warfare. Owning a weapon NFT will have it ready for the owner at the start of each round.

The NFTs will appear in 6 different rarity classes.

Common, Uncommon, Rare, Epic, Legendary, Ancient.

If a player owns a Gaming NFT, this item will already be in their inventory at the beginning of each round in addition to the character's standard equipment and does not need to be purchased separately.

For example, if the player holds an AK47 weapons NFT, it will already be in their inventory at the start of each round. The same applies to all other gaming NFTs.

No more than the maximum designated number of an item can be held in the inventory.

More Details about CoinCombat: Digital Rivals will be added soon!

Other Games

While CoinCombat takes center stage as one of TecVise flagship projects, TecVise Games has an exciting lineup of additional games in the pipeline. These games will be developed and released over time.

In addition to our in-house creations, TecVise Games will also introduce partner games through our platform, further enriching the gaming experience for our community of players.

ROADMAP

Phase 1: Game and company development.

- Launch of TecVise Games website and social media presence
- 2. Announcement of our first blockchain game title
- 3. Teaser trailer of upcoming games
- 4. Vise pre-launch marketing campaign
- Influencer, YouTuber, press articles, ad campaigns
- 6. CEX and DEX listings, CMC and CG listings
- 7. Launch of the Vise Token on the Ethereum mainnet
- 8. Introduction of staking and reward features
- 9. Beta launch of the TecVise Platform
- 10. Release of the first gaming NFT's

Phase 2: Game launch, partnerships and platform developments.

- Integration of VISE into the games ecosystem
- 2. Implementation of DAO voting system
- 3. Expansion of the TecVise platform
- 4. Implementation of other partner games
- 5. Implementation of other NFT's
- 6. Release of the first TecVise blockchain game
- 7. Integration of game ambassadors
- 8. Sale of digital lands
- 9. Scale TecVise platform to more than 10 games.
- 10. Launch of the FPS CoinCombat

Phase 3: Community and marketing

- 1. Goal: Build more than 1,000,000 active players by 2027
- 2. Community gaming competitions on the TecVise platform
- 3. Establish our own blockchain game league with high prize money
- 4. Implementing over 20 games on our platform
- 5. Collaboration with the biggest web2 game studios
- 6. Appearance and sponsorship at international gaming and crypto trade shows
- 7. Marketing of the first games on Steam
- 8. Listings on other top tier CEX
- 9. Promotion of professional gamers
- 10. Onboarding of top gaming influencers

Ongoing

- continuous development of new blockchain games
- community-driven management and decision-making
- crypto and game oriented marketing
- building a loyal crypto and gaming community
- partnerships with other blockchain gaming projects

Conclusion

TecVise Games is unwavering in its commitment to ushering in the future of blockchain gaming. Through the VISE Token (VISE), our aspiration is to cultivate an ecosystem where gamers can not only indulge in our groundbreaking games but also accrue tangible value. This journey has only just embarked upon its course, and we extend a heartfelt invitation for you to accompany us on this exhilarating adventure.

Disclaimer

The information presented in this whitepaper is subject to alteration as the project progresses. TecVise Games provides no assurances regarding the future value of the VISE Token (VISE) and strongly encourages users to exercise due diligence and seek financial counsel before engaging in any token-related activities. It is imperative to acknowledge that investing in cryptocurrencies carries inherent risks, and potential losses should be acknowledged. TecVise Games bears no responsibility for any financial losses incurred by participants within our ecosystem.

Please note: This whitepaper serves solely for informational purposes and does not constitute financial or investment advice. Always conduct comprehensive research and consult with a qualified financial advisor prior to making any investment decisions.

Inherent Risks

In the following, not all, but only the key risks associated with the purchase of the tokens can be listed:

- Regulatory and Legal Risks: As with any foreign purchase, navigating local laws, regulations and rules can be challenging for international buyers. Changes in regulations or legal disputes could impact the tokens and their validity.
- Geopolitical Tensions: Dubai's strategic location in the Middle East exposes it to geopolitical risks and regional conflicts that could impact the overall business environment and may make the continued operation of the Company impossible.
- Market Transparency: Despite improvements in transparency, the UAE may still lack the same level of transparency as more established markets. Economic downturns, geopolitical events, or travel restrictions can disrupt tourism flows, leading to revenue losses and potential economic instability.
- Regulatory Risks: Adapting policies to accommodate international expectations and perceptions may require changes in regulations and legal frameworks. Rapid changes or uncertainties in regulatory environments could pose challenges for enterprises, potentially leading to delays, increased costs, or compliance issues and worst case to a failed business case.

Disclaimer

- **Security Risks:** A significant number of tourists and residents in one location may attract security risks, such as terrorism or civil unrest. Ensuring the safety and security of all stakeholders becomes crucial to maintain a positive image of the UAE as a safe destination.
- Management Risk: The success of TecVise's overall performance depend on the expertise, networking and recruiting abilities and last but not least on the effectiveness of the core team members. The success depends on the skills, experience, and decision-making of the core team. Any unexpected changes in the leadership or team dynamics could introduce uncertainties for the TecVise Project. The successful execution of the project relies on management, coordination, and implementation of various tasks, including but not limited to risk management, game development, and member services. Any mismanagement or operational challenges or unforeseen circumstances could affect the outcomes.
- Token Risks: The use of the Tokens and NFT's involves digital assets susceptible to cybersecurity threats, such as hacking or phishing attacks. Ensuring robust security measures is essential to protect community members' assets and information.
- The purchase of the Tokens and NFTs Risk: Buying TecVise Tokens and NFT's carries inherent risks, including price volatility, regulatory changes, and market illiquidity. The value of the Token and NFT's may fluctuate, and owners may not be able to sell them at the desired price, resulting in potential losses. It may be challenging to sell them quickly, especially during times of market uncertainty.
- Token Value Volatility: The value of the Tokens and NFT's could be subject to significant price volatility in the cryptocurrency market, price fluctuations detached from the actual development of TecVise.
- **Membership Adoption:** The success of the TecVise Project depends on attracting a sufficient number of members. If membership adoption falls short of expectations, it could affect the TecVise ability to attract and manage games effectively.
- Infrastructural Development Risk: Building up the necessary infrastructure for TecVise, including property acquisition and platform development, entails risks related to construction delays, cost overruns, and regulatory compliance.
